<http://zahymaka.com>

*I started programming when I got out of high school in 2004, couldn't get into the university and had to stay home for one year.*

*I initially started with C++, followed by Visual Basic 6 and then ASP. My first web development job was built in ASP, but my client purchased hosting on a Linux host without ASP support so I found myself having to learn PHP.*

*About a year later, just before I came over to the United States to study, I discovered Wordpress and started writing themes and plugins for it. Since then I've gone on to explore frameworks starting with CodeIgniter, then moving onto Kohana.*

*My freelance work during college got me to learn how to do other things, especially working with jQuery.*

---

## Technical Skills

**Like:** php, jquery, kohana, wordpress, capistrano, jenkins, ant  
**Dislike:** visual-basic

---

## Experience

**Web Developer** – NoRookie Media Inc. *August 2010 - Current*  
I got here to fill an internship position as the web developer on the team. My responsibilities include translating designs to semantic html and all web development work.

**Freelance Web Developer** – Self-employed *2006 - Current*  
This was my way of supporting myself during school as well as challenging myself. I also wanted to keep up with the times so I wouldn't be at a complete loss when I graduated.

**Intern** – Mountain State University *February 2010 - May 2010*  
I worked as a Desktop Intern assisting the other members of the team with their day-to-day activities.

**Computer Lab Assistant** – Mountain State University Library *February 2006 - May 2009*  
Troubleshooting problems, student assistance, monitoring of the lab. Also wrote a client-server application that ran diagnostics on all the lab computers.

**Application and Web Developer** – CAD Consulting *January 2005 - December 2005*  
Worked on software projects and web applications using the .NET framework. I used VB.NET when working with my team and C# when I worked alone.

---

## Education

**B.S. Computer Science** – Mountain State University *2006 - 2012*  
My GPA is 3.6.

I've been on the Dean's List for most of my semesters and on the President's List twice.

When I worked in the library as a computer lab assistant, I wrote a server-client application in C# that ran on all the computers and let me see when one was in use, a list of installed programs, available disk space and memory which allowed me to troubleshoot them from one location.

**High School** – Federal Government Academy, Suleja *1998 - 2004*

---

## Projects & Interests

**Stack Overflow** – <http://stackoverflow.com/users/66688> *February 2009 - Current*  
Written 31 answers. Active in php.

---

**GitHub - ZForm** – <https://github.com/Azuka/ZForm>  
php

*October 2011*

Successor to Kohana-ORMForm. Should be a lot easier to configure/use

core developer

---

**GitHub - ZForm** – <https://github.com/Zahymaka/ZForm>  
php

*October 2009 - August 2012*

Successor to Kohana-ORMForm. Should be a lot easier to configure/use

---

**GitHub - Notify** – <https://github.com/Azuka/Notify>  
php

*October 2011*

A simple Kohana 3 module designed to capture messages from different methods and modules to be displayed later with a unified look and feel.

---

**GitHub - Kohana-Database-MySQLi** – <https://github.com/Azuka/Kohana-Database-MySQLi> *June 2010 - September 2011*  
MySQLi  
php

---

**CongreGATE** – <http://www.congregateonline.com/>  
php, kohana, jquery

Church management system

Developer

---

**Portfolio** – <http://zahymaka.com/portfolio>

My current portfolio.
